

Conversion Kit® for Komatsu Wheel Loaders

WA1200-3, WA1200-3 High Lift

WHAT DOES THIS LOGO MEAN?

After extensive review of the simulation industry, Komatsu entered into a license agreement with Immersive Technologies in 2006 (Renewed in 2011).

Komatsu exclusively allows Immersive Technologies to use its proprietary machine information to ensure its simulators are engineered to the highest fidelity and realism.

As part of this agreement Komatsu exclusively recommends Immersive Technologies' Advanced Equipment Simulators to Komatsu dealers and mining customers worldwide.

Increase operational safety and productivity while reducing your maintenance spend

Immersive Technologies' Conversion Kit development for the Komatsu WA1200-3 Wheel Loader provides the ultimate in training realism for mines focused on increasing operator safety, improving productivity and reducing levels of unscheduled maintenance.

The Conversion Kit includes a complete replica cab of the Komatsu WA1200-3 Wheel Loader, with fully functional controls and instrumentation sourced directly from Komatsu.

Original Equipment Manufacturer and industry endorsed WA1200-3 operating procedures are tightly integrated with an extensive learning system within the Advanced Equipment Simulators. This system has been repeatedly demonstrated via evidence collected from within mining operations to provide rapid, correct and effective learning and assessment.

With mining equipment becoming increasingly technically sophisticated, the level of information, experience and organizational competencies required to accurately simulate these machines also increases. Through Immersive Technologies' industry experience and exclusive alliance with Komatsu, you can be assured your training solution will be the only accurate and true representation of the real machine available.

Accurate operational characteristics using technology and proprietary data licensed from Komatsu

Conversion Kits® utilize genuine Komatsu cab controls and instrumentation

Simulation Delivering Safety & Productivity

WL41 Conversion Kit[®] for Komatsu Wheel Loaders

Immersive Technologies' WL41 Conversion Kit provides the ultimate in training realism for mines focused on increasing operator safety, improving productivity and reducing levels of unscheduled maintenance.

The Conversion Kit includes a complete replica cab of the Komatsu WA 1200-3, WA1200-3 high lift wheel loader, with fully functional controls and instrumentation sourced directly from Komatsu.

These include an operational 'Electronic Display Monitoring System' (EDIMOS II), Komatsu's powerful functional monitor panel well received by operator's worldwide displaying on-line travel speed, gear position, travel-conditions along with diagnostic capabilities designed to work together for higher production, greater reliability and more versatility.

Main Monitor EDIMOS II (Electronic Display Monitoring System)

Replica engine RPM Set System

Advanced Joystick Steering System (AJSS)

Bucket and boom control levers

Functional wiper and special views switches

Clutch, brake and throttle pedals match real machine cab

Conversion Kit: WL41

Released: July 2007

NB: Seat & Base not included.

Digging Scenarios

Dumping Scenarios

Startup / Shutdown

CONVERSION KIT® COMPATIBLE WITH

Advanced Equipment Simulator
PRO3
 DESIGNED FOR SURFACE MINING
 AES Series 2, AES Series 2B

Innovative Simulator Training Software

SimControl
 IMMERSIVE TECHNOLOGIES

Immersive Technologies' SimControl software includes a range of specific Komatsu WA1200-3, WA1200-3 High Lift operator errors for recording and measuring incorrect operator behaviours. In addition, the SimControl software includes Komatsu WA1200-3 and WA1200-3 High Lift events which allow a trainer to initiate machine faults or incidents in order to train and assess operators in responding appropriately. This combination of errors and events provide a mechanism to ensure operators are working at maximum efficiency while minimizing equipment damage. It also ensures operators are able to avoid or respond correctly to hazards and potentially life threatening scenarios.

Operator errors and events include a focus on the following areas:

- Hazard Avoidance
- Brake Management
- Engine Management
- Gear Management
- Operator Productivity
- Site Safety Procedures
- Tire Management

Komatsu Supported Development

Developed together with Komatsu's Product Engineering, the WL41 Conversion Kit combines machine specific technical data exclusively provided to Immersive Technologies by Komatsu.

With mining equipment becoming increasingly technically sophisticated, the level of information required to accurately simulate the machines also increases. Through Immersive Technologies' exclusive alliance with Komatsu you can be assured your product is the most accurate and true representation of the real machine.

Transforming data to information

SimMetrics™ is a powerful reporting system that helps you review, measure and visualize your simulation data. With an intuitive click-and-drag user interface, you don't need to be a programmer to quickly generate detailed reports on the results of your training.

SimMetrics Benefits:

- Operator and crew benchmarking
- Trending analysis of operator performance
- Early identification of equipment misuse and damage
- Recording of emergency scenario training results
- Enables comparative analysis against site in-pit results.

Support where and when you need it

You purchase the world's best mining simulation to get the job done. Immersive Technologies provides you the support and peace of mind to make sure your simulator achieves this goal.

Our customers receive a range of comprehensive support services:

- 24hr phone support
- Rapid emergency visits
- Scheduled on-site service
- Regular maintenance support
- Hardware and software upgrades
- Extended parts warranty
- Best practice training and community networking.

Contact Immersive Technologies today to discuss which of our five year Customer Support Programs best suits your sites' requirements.

Training Systems Integration for Komatsu Wheel Loaders

The success of your simulator training depends largely on the knowledge and application of the technology. Immersive Technologies offers on-site and customized consultation programs to assist mines to rapidly integrate their simulator technology, implement training program best practices and achieve maximum return on investment.

Immersive Technologies application specialists work closely with you to develop a customized Komatsu wheel loader training curriculum, including the development of detailed performance based benchmarks and reporting systems tailored to your site's specific objectives.
